

# i2 Analytical Geotechnical and Materials testing

i2's Geotechnical testing department first gained UKAS Accreditation in 2015 and provides testing in accordance with British and European standards to provide clients with a high quality service.

Complementing i2's established environmental and geotechnical laboratories, i2 Analytical are now able to offer insitu testing and sampling with its Geotechnical Site Services team from across the UK. The testing i2 are able to offer supports a wide range of related sectors including GeoEnvironmental consultants, Site investigation contractors, and Local Authorities Civil Engineering and landfill construction companies, together with quarried and recycled aggregate (WRAP) producers.

i2 Analytical has, from the outset been keen to demonstrate its intent to be among the market leaders in the geotechnical testing sector and has invested in the latest automated testing equipment and reporting system by keylab2, this allows for a fluid transition of data from registration to reporting which can be in PDF and AGS 3.1 and 4.0 formats.

The Geotechnical department is headed up by Darren Berrill. Darren and his expert team have a wealth of knowledge and expertise within the geotechnical sector. Darren and the geotechnical team ensure that client requirements are always met to the highest of standards.

How can i2 help?

- Classification Testing
- Compaction, Earthworks & Testing of Stabilised Soils
- Geochemical Testing
- Strength & Compressibility
- Permeability & Durability
- Rock & Aggregate Testing
- Site Testing Services
